

2017 ABBOTT THERAPY CODING GUIDE

HCPCS DEVICE CATEGORY C-CODES

This guide provides physician and hospital coding and reimbursement information. In addition, Abbott offers a reimbursement hotline, which provides live coding and billing information from dedicated reimbursement specialists. Hotline support is available from 8 a.m. to 5 p.m. Central Time, Monday through Friday at (855) 569-6430 or hce@sjm.com. Hotline reimbursement assistance is provided subject to the disclaimers set forth in this guide.

This document and the information contained herein is for general information purposes only and is not intended and does not constitute legal, reimbursement, coding, business or other advice. Furthermore, it is not intended to increase or maximize payment by any payer. Nothing in this document should be construed as a guarantee by Abbott regarding levels of reimbursement, payment or charge, or that reimbursement or other payment will be received. Similarly, nothing in this document should be viewed as instructions for selecting any particular code. The ultimate responsibility for coding and obtaining payment/reimbursement remains with the customer. This includes the responsibility for accuracy and veracity of all coding and claims submitted to third-party payers. Also note that the information presented herein represents only one of many potential scenarios, based on the assumptions, variables and data presented. In addition, the customer should note that laws, regulations, coverage and coding policies are complex and updated frequently. Therefore, the customer should check with their local carriers or intermediaries often and should consult with legal counsel or a financial, coding or reimbursement specialist for any coding, reimbursement or billing questions or related issues. This information is for reference purposes only. It is not provided or authorized for marketing use.

The Medicare Hospital Outpatient Prospective Payment System (OPPS) requires providers to report device category C-codes on claims in order to improve the claims data used to annually update the OPPS payment rates. Logic edits have been created to require certain procedures and devices to be billed together. Procedure-to-procedure edits may look at billed procedure codes and return claims if certain required device codes are not billed on the same claim. Likewise, device-to-procedure edits may look at certain device codes billed on a claim and may return the claim if a required procedure where the device was used is not also billed on the same claim. These edits can be found at: http://www.cms.hhs.gov/HospitalOutpatientPPS/02_device_procedure.asp#TopOfPage.

Revenue Codes and HCPCS Codes

Level II HCPCS codes, including C codes, are not applicable to Valve and Vascular products utilized for in-patient procedures such as valve replacement. C codes are used in conjunction with the Medicare prospective payment system for outpatient procedures only.

Revenue codes help hospitals categorize services provided by revenue center. Medicare utilizes revenue codes for cost reporting purposes. For Medicare, revenue codes must be included for each service on a CMS 1450 (UB-04) claim form. It may be appropriate for hospitals to capture the cost of products used for the procedures described above within Revenue Code 0278 (Medical/Surgical Supply – Other Implant) or Revenue Code 0360 (Operating Room Services - General). Health Care Common Procedural Coding System (HCPCS) codes include level I codes (CPT™ Code, described above) and level II codes (other products, supplies, and services not included in CPT Code).

* Generally, C-codes have not been established for kits. However, if the kit contains individual items that are identified by C-codes, these items may be billed separately using applicable C-codes. The Epicardial Catheter System kits contain two components with C-codes: The Agilis EPI Steerable Introducer (C1766) and the Response™ Catheter (C1730).
